Rep. Adam Neylon
C/o WI State Assembly
PO Box 8953
Madison, WI 53703

Dear Rep. Neylon, *Adam*

In advance of your public hearing for Foxconn on Thursday I would like to share my thoughts and opinion on this project. Foxconn is a total game changer for the State of Wisconsin. This will change of how the rest of the country and the world will look at Wisconsin. We will no longer be the land of cheese heads and a rustbelt state, instead it will look like a state that reinvented itself to the land of leading edge technology. The opportunity of creating 13,000 new jobs at Foxconn along with 22,000 what I call ripple jobs are a plus for Wisconsin. The news of 10,000 new construction jobs is also great news for our industry.

The \$3 billion investment being asked to the State of Wisconsin is not only an investment of infrastructure and other needs that have been neglected. This investment will change the needs for training for these types of jobs and careers of the future.

I am not surprised by the negativity of some of the local media because they cannot take positive news and successes and hard work from elected officials like you and the Governor. It is my hope to have the legislature to do their due diligence on this legislation and get it to the Governor's desk for his signature quickly!

Sincerely,

Robert R. Dennik
