

**DRW Statement on [AB-1005](#) / [SB-934](#) Voter Registration Lis**  
February 20, 2022

As the federally mandated Protection and Advocacy system for our state, Disability Rights Wisconsin (DRW) is charged with protecting the voting rights of people with disabilities and mandated to help “ensure the full participation in the electoral process for individuals with disabilities, including registering to vote, casting a vote, and accessing polling places.” (Help America Vote Act, 42 U.S.C. § 15461 (2002)). DRW staffs a Voter Hotline and assists voters with disabilities and older adults, family members, service providers, and others. In coordination with the Wisconsin Disability Vote Coalition, we provide training and education to voters with disabilities, their families, and service providers. The hotline and trainings provide us with a frontline understanding of the barriers experienced by many voters with disabilities.

**Voters with Disabilities**

A significant number of Wisconsin voters have a disability. The CDC indicates that 26% (1 in 4) of adults have some type of disability. According to the American Association of People with Disabilities (AAPD), approximately 23% of the electorate in November election were people with disabilities. Many older adults have disabilities acquired through aging, although they may not formally identify as a person with a disability.

Historically voters with disabilities are underrepresented at the ballot box. Many experience barriers to voting including the following:

- Polling place and voting documents are not always accessible.
- High percentage are non drivers and lack access to transportation, especially accessible transportation
- Lack of photo ID and difficulty obtaining it because they don’t have transportation to get to DMV, and DMV hours are very limited
- Limited information about their voting rights including disability related accommodations.
- Legally required accommodations such as curbside voting and ballot assistance are not uniformly available; some voters experience discrimination and denial of accommodations.
- Lack of access to the internet and/or devices that connect to the internet, and to equipment to copy photo ID.
- May live in a group home or place with many other people where ability to independently leave, get information, or get online is limited or restricted.

**Federal Law and Voting Rights**

As referenced in this testimony, the US Department of Justice and other federal agencies issue guidance to protect the fundamental right to voting for all Americans,

including specifically addressing the rights of voters with disabilities to have equitable access to the ballot. These rights are protected by federal laws including the Americans with Disabilities Act (ADA), the Voting Rights Act (VRA), the Help American Vote Act (HAVA), and other civil rights law. It is important that that these bills align with the protections for people with disabilities provided by [federal law as summarized in the linked document](#).

## [AB-1005](#) **Voter Registration List** Information Only

Based on DRW's review of the bill, we are very concerned about some provisions in this bill related to maintenance of voter registration lists. We also noted some provision that would be helpful for others with disabilities. For that reason, our comments are for Information Only. The following provisions in the bill merit comment because of their impact on voters with disabilities.

- **Changes in status for Voters Who Move.** The bill would require that people who move within a municipality be marked ineligible to vote. Clerks would no longer be allowed to send the voter a confirmation notice, and update the information without requiring the voter to re-register.

**Concern:** Many people with disabilities experience housing insecurity and may move often. The current process initiated by the clerk provides a reasonable way for local election officials to maintain current registration information without requiring community members to re-register.

- **The bills would require that information received from ERIC be considered reliable for purposes of changing voter status to ineligible.** .

**Concerns:** The accuracy of ERIC data has been the subject of litigation, because of proven error rates in the range of 5 – 10 percent. In addition, ERIC relies in part on DMV data. In most states, the DMV has a role in assisting with voter registration, as required by the NVRA. This is not the case in Wisconsin, so DMV data is not as reliable a source as it may be in other states

- **Lines at Polling Places.**

This bill would require chief inspectors to report and document each occurrence of voters waiting in line for at least one hour before voting. It would require that municipalities who report this take all necessary steps, including establishing additional polling places, to ensure that voters do not wait in line for an hour or more at future elections.

Long lines at the polling place are especially problematic for some voters with disabilities and older adults who are not able to wait in line for a long time. We support provisions in SB-934 to address this barrier.

**Recommendation:** An additional recommendation regarding long lines would be enforcing the Wisconsin law which requires that curbside voting be available for voters who because of disability are not able to enter the polling place. This accommodation is not consistently available, and we have received multiple reports of voters who have been denied this accommodation and are not able to wait in line. We ask policy makers to also take steps to ensure access to curbside voting.

- **Clerk Training.** The bill would create additional training requirements for municipal clerks including and requiring a clerk to complete at least three hours of training prior to conducting an election for the first time. We support this provision to address adequate training for clerks. Such training provides important information about voting rights, including the rights of voters with disabilities to have equitable access to voting, and disability related accommodations required by state and federal law.

DRW welcomes the opportunity to work with policy makers to ensure that every eligible disabled voter has the opportunity to register to vote and cast a ballot, no matter where they live or how they vote. We are committed to ensuring that that Wisconsin elections are accessible and inclusive, and protect the rights of Wisconsinites with disabilities and older adults.
